

How to install and activate ESET Software

1. Selecting Your ESET Product:

- To find your ESET product, visit <u>ESET Download Center</u>.
- Press «Show detailed download options» to get the list of all the programs. Please find your program and press «Download» Finnish the manual download process and install the program.

2. Activating Post-Installation (for Windows):

ESET Endpoint products are normally activated during the installation process. To activate yor product after installation, please follow the steps below.

- After installing your ESET product, open the main program window.
- Click on 'Activate product'. This can typically be found in the main window or under 'Update' → 'Activate product' or 'Help And Support' → 'Activate product'.

3. License Key Entry:

- Enter your ESET-issued License Key into the 'License Key' field and click 'Activate'.
- Your License Key should have been sent via email after the purchase of your ESET license.

4. Finalizing Activation:

• Once your license key is accepted, click 'Done' to complete the activation process.
