

## **McAfee Product Setup and Activation Guide**

### **1. Initiate Activation:**

- Begin by navigating to [McAfee Activation Page](#).

### **2. Product Key Entry:**

- Locate the 25-digit product key provided to you. You can find this in the email sent to you or on the order page in our webshop.
- Enter this key in the designated field on the activation page. It's vital to copy and paste it accurately to avoid errors.

### **3. Account Login or Creation:**

- If you're an existing McAfee user, log in with your credentials. New users should create a McAfee account by following the on-screen instructions. This account will manage your product licenses and settings.

### **4. Downloading McAfee Software:**

- After logging in and entering your product key, you'll be directed to download the McAfee software.
- Follow the download instructions and proceed with the installation on your device.
